The comfort access system puts an end to searching for car keys in your handbag or pockets. Simply approach your BMW, open the door and press the Start button. Your unique key is recognised remotely by the comfort access sensors. As soon as you come within 1.5 metres of your BMW, the comfort access system remotely senses your BMW key, wherever you happen to be carrying it – in your jacket pocket, handbag or briefcase. Simply touch the door handle and the door unlocks. The system also senses when you've entered the cabin and enables the Start/Stop button, so all you need to do is press it and drive off.

Brand Grade: Grade One
